## Work History

### Discord.Market

Web Developer – 2020

Discord.Market is a forum/job-listing website that is focused for creators and freelancers and given the tools to advertise their services within the platform. As a web developer, my tasks included:

- To create the back-end of the website and scale it as the project grows.
- Designed the UI/UX of the website.
- Ensure stability and maintain the website secure.
- Manage the website's server and resources.
- Integrate to Discord API

### PvPTemple

Web Developer – 2018

PvPTemple is a community website for their Minecraft Server. Their website displayed announcements from their announcements and provided services for their community such as a forum and public leaderboards. As a web developer, my tasks included:

- To create the backend for their forums and leaderboards
- Designed the UI/UX of the website.

## Usercord

Web Developer – 2020

A social media website integrated with Discord features. Features a timeline, profiles, messaging system, post/poll creation, following/follow system, and settings. Can automatically display user's joined Discord servers and detect activity presence.

- To create the back-end of the website and manage its systems
- Designed the UI/UX of the website.
- Ensure stability and maintain the website secure.
- Manage the website's server and resources.
- Integrate to Discord API (User Info, Server Lists, etc)
